

FOH SPEAKERS

EAW KF730 Line Array with 8 boxes per side and 12 EAW Sb1000 dual 18 subwoofers. Each mid/high cabinet is loaded with (2) 10 inch midrange, (2) 7 inch high mids and (2) compression H.F. drivers. The subs are loaded with (2) 18 inch drivers in a clam shell configuration. The full system is a total of 120 individual driver elements and it is shockingly loud for such a compact rig.

We use a digital laser range finder and factory software to setup the dimensions and slope of each section of the venue to calculate cabinet splay settings and array frame positions to perfectly cover the venue. This system is smooth and very powerful at a staggering 62,000 watts.

Side Fills available on request

IN-EAR MONITORS

We supply up to 8 Sennheiser EW300-G3 Stereo In-Ear systems complete with paddle antennas and a properly planned frequency chart for your region. Our monitor techs are pros at mixing monitors and own their own ear buds to listen in. This in-ear system features “engineer mode” Allowing the monitor tech to have their own body pack and be able to jump from one performer’s frequency to another for mixing purposes.
