

FOH SPEAKERS

Each speaker stack consist of an EAW SB850 double 18" subwoofer under a TAVL 2152 mid/high pack of our own design, loaded with 2 RCF-s800 15" drivers and an RCF-n850 2" compression driver. Each stack is tri-amped and the whole system consists of up to four stacks per side. Each array is powered by CROWN Macrotech 5002's on the subs and midrange drivers and a Macrotech 1202's on the horns. Total output power is 34,000 watts. We get plenty of engineers that turn their nose up at the thought of a proprietary box but at the end of the day we get compliments on how this rig sounds every time. These cabinets are extremely well designed and have been assembled much more solidly than most factory boxes.
